

Hi-fi screens

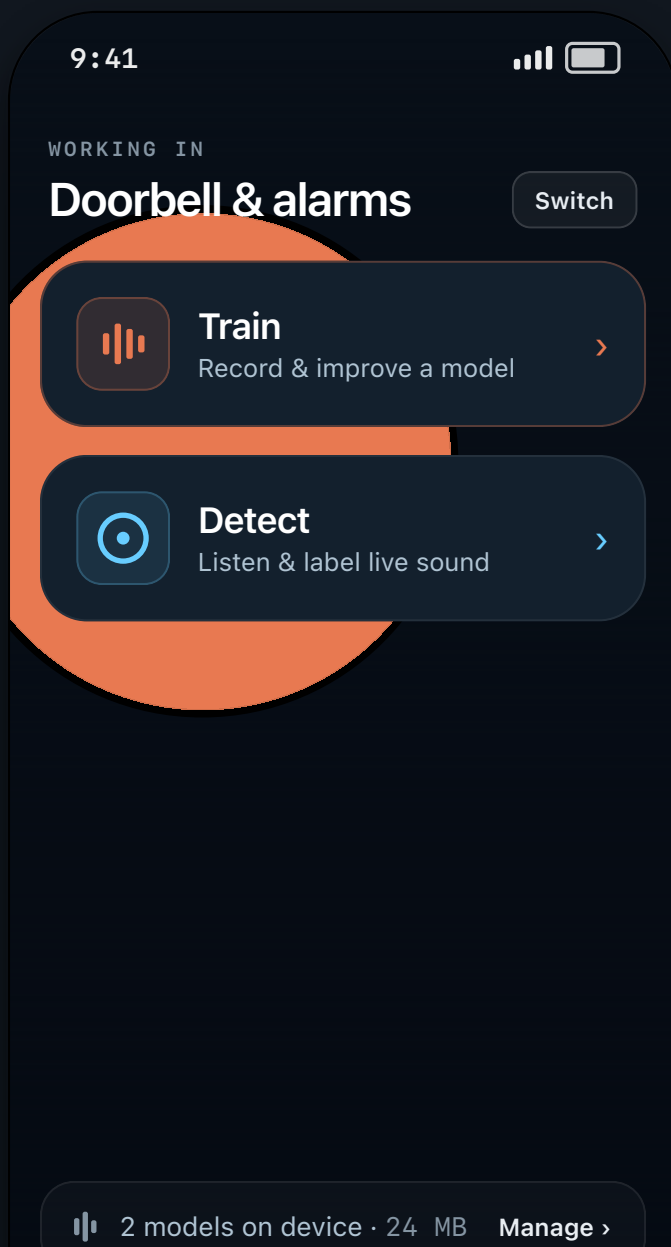

A compact control surface: dark navy instrument panels under native liquid-glass chrome, SF Pro with mono readouts, and semantic color — **orange for action**, **blue for analysis**. Train · Detect · Models · Settings.

☒ Action accent ☒ Analysis accent ☐ Instrument panel

A · LAUNCH & CONTEXT

Two front doors, one sticky context

01 HOME · LAUNCH

Train

Detect

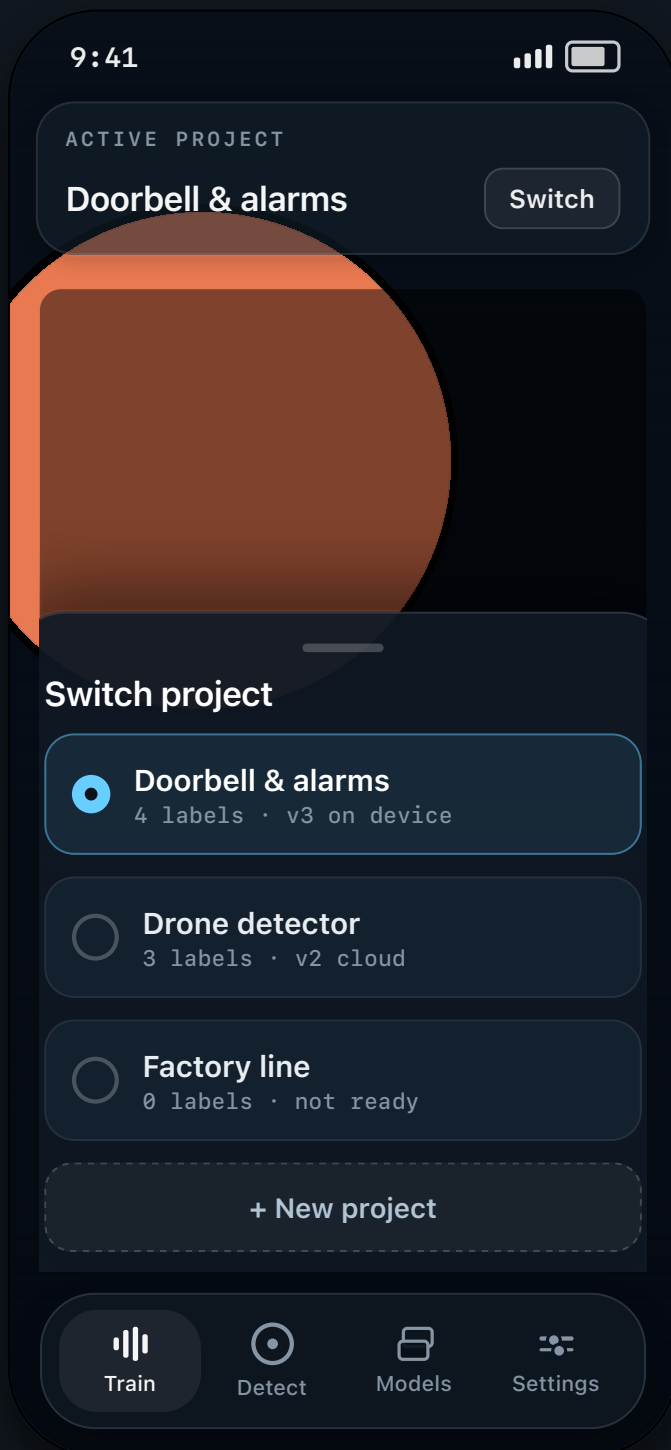

Models

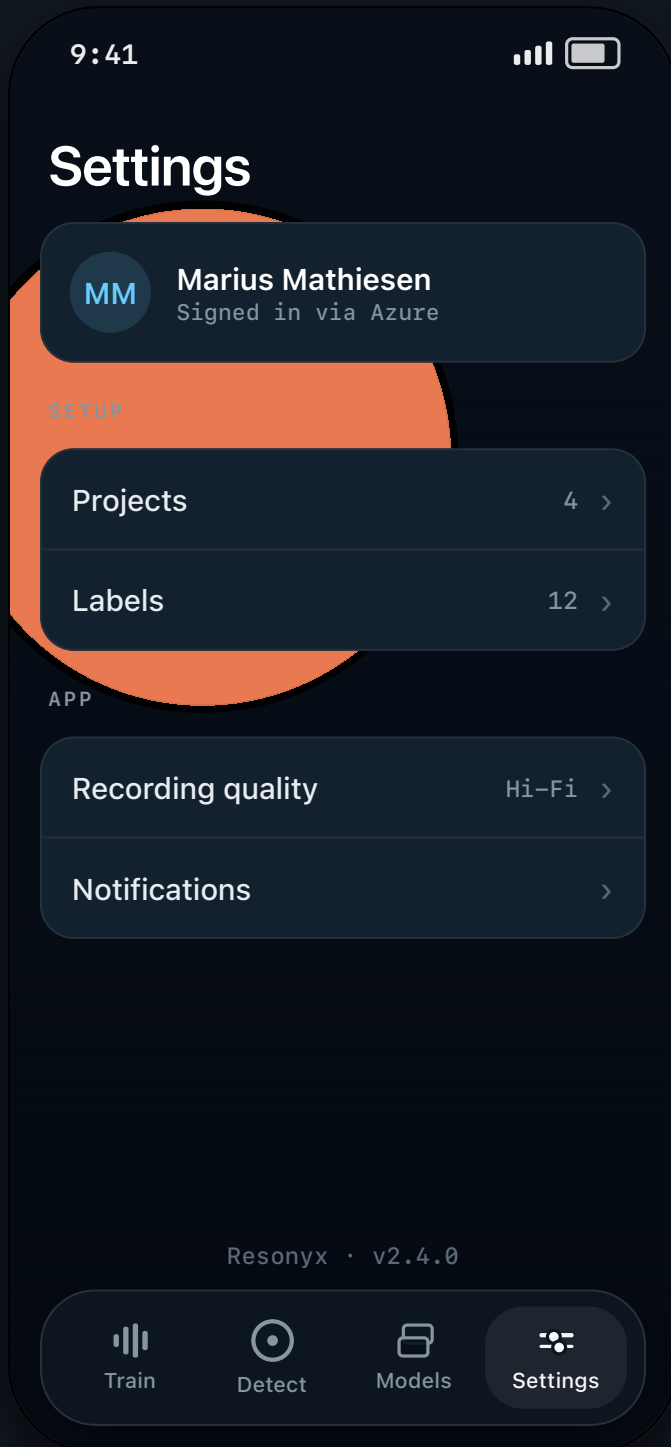

Settings

→ Two tasks, not marketing tiles. Train carries a faint orange edge; Detect a faint blue. Status secondary.

02 SWITCH CONTEXT · SHEET

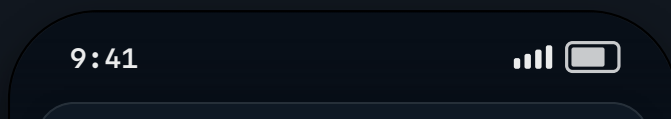

→ Native dark glass sheet. Selected row uses the blue selection accent; rows sit more solid than the sheet.

→ Projects & Labels live quietly under "Setup" – present, not competing.

B · TRAIN

Readiness → train → install

READINESS

READY

- ✓ 4 labels assigned
- ✓ 3 of 4 labels have audio
- "Alarm" has no clips yet

Add

• Latest: v3 · trained 2 days ago

● Record audio

Train new version from uploads

Train

Detect

Models

Settings

→ **Record audio** is the primary loop (capture & label data); training from existing uploads is the secondary action. Blue ticks read as verified.

v4

CLOUD · NOT ON DEVICE

Removing deletes only the **on-device copy** and frees space. The trained version stays in the cloud — re-install any time.

Train

Detect

Models

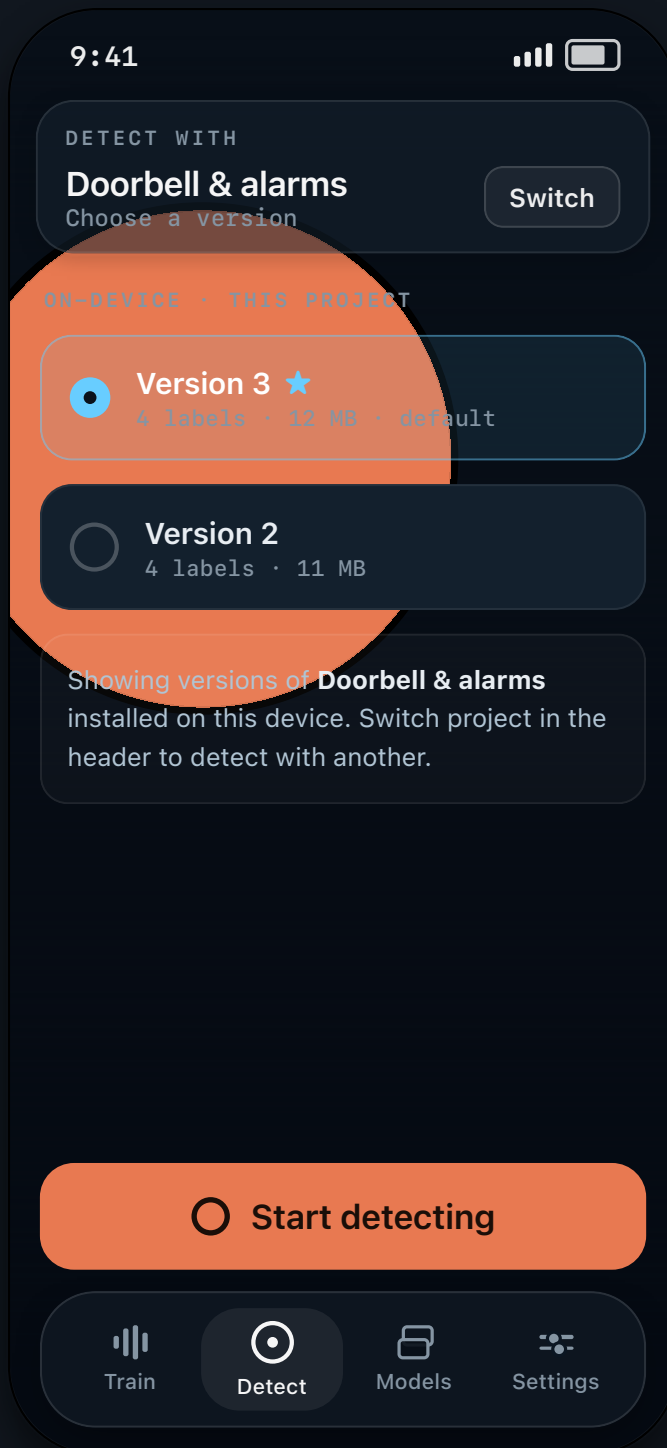

Settings

→ Standard iOS Edit → red minus → Remove

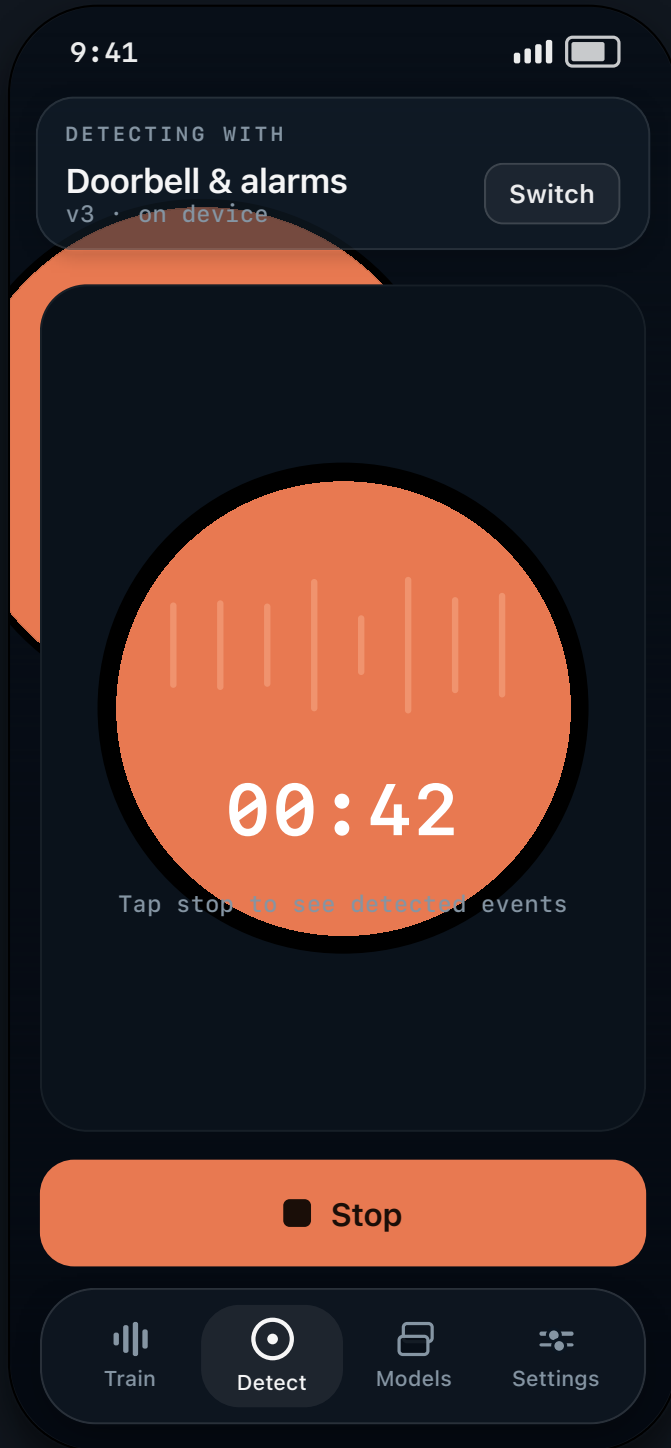

D · DETECT

Choose model → listen → timeline

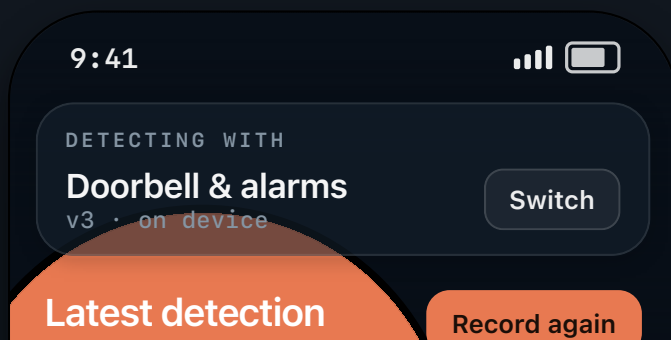

09 CHOOSE MODEL

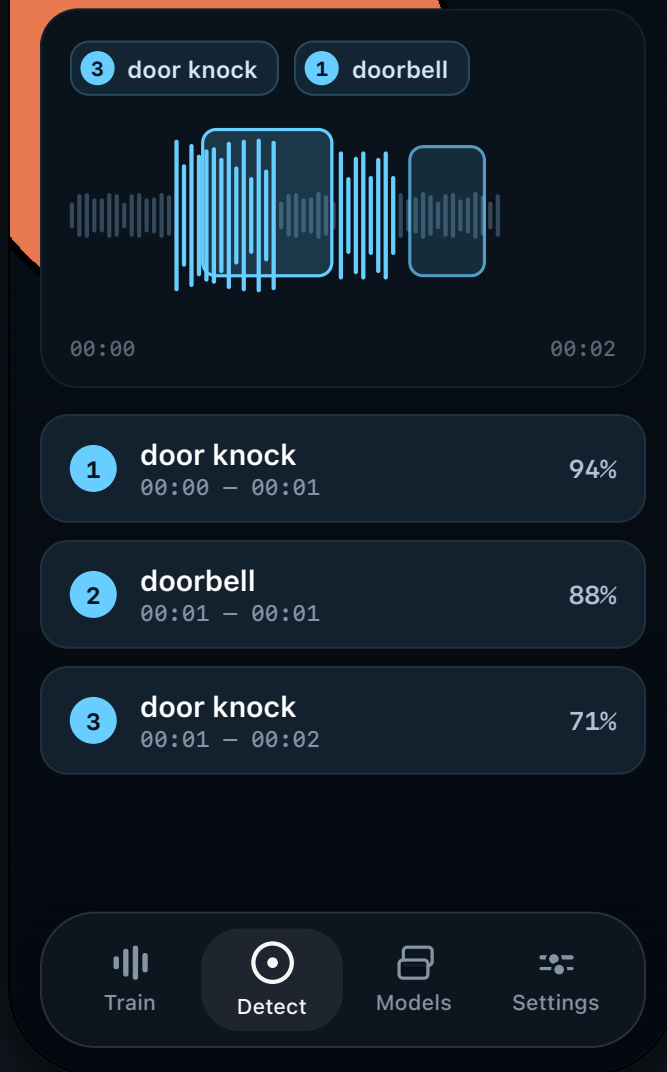

→ Scoped to the active project's installed versions. Default (★) is preselected; Start is the orange action.

→ Recording is an action → orange meter on a solid instrument panel. Timer + Stop, nothing else.

16 Jun 2025 - 11:35

→ Analysis = blue. Proportional selection windows + numbered markers tied to a compact event list.
